DETAILED ACTION

1. The Amendment filed on 9/20/2004 has been entered.

Election/Restrictions

2. Claims 2, 4, 5, 8, and 12-14 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species I-XV, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 3724

5. Claims 1, 3, 6, 7, 9-11, 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Freund et al (DE 199 29 272) in view of Schaller et al.

Freund et al discloses the invention substantially as claimed except for a two-axis cutter. However, Schaller et al teaches a cutter system in which a two-axis cutter (13, 26) arranged orthogonal to each other is used to cut a cut larger sheet having photos thereon into individual photographic images including trim. See whole publication. Thus, it would have been obvious to the ordinary artisan at the time of the instant invention to provide the device of Freund et al with the two axis cutter as taught by Schaller et al in order to facilitate cutting of individual photos of desired dimensions.

Response to Arguments

6. Applicant's arguments filed 9/20/2004 have been fully considered but they are not persuasive.

In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the suggestion to combine stem from both references. To the extent that Applicant argues that Freund et al is "limited" to full width cuts of printed media, it is clear from the teachings of Schaller et al that a more diverse form of cuttings can be made for a given size of sheet material,

Art Unit: 3724

thus expanding the versatility of the primary device teachings. It is noted that while Freund et al cuts "full widths", it is clear in this art that Freund et al inherently includes the capability of cutting sheets into different lengths. With the teachings of Schaller et al, Freund et al's device will be capable of cutting smaller products of a given sheet size. It is further noted that it is not clear how Freund et al does not include many of the elements argued by Applicant in paragraph 1 of the arguments section (e.g. p. 11). In Freund et al, the control means inherently controls all aspects of the image processing including digitized images. It is the Examiner's view that the only thing Freund et al appears to be missing is the two-axis cutter to which Schaller et al renders this feature obvious to the ordinary artisan.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
